

ATTA CAPITAL — MINDSET DICTATES OUTCOMES

JUST A GUY TRADING FUTURES.

Part-time prop firm trader. NQ/MNQ during a 3-hour window every morning.

I kind of suck at trading. I also have \$45K+ in payouts. Both things are true — and that's kind of the whole point of this place.

NQ STRUCTURE WATCH: KEY LEVELS HEADING INTO THE OPEN

Market bounced off the overnight low into a key structural zone. Volume profile shows a thin area above current price — watch for a push into the upper half of yesterday's range before any reversal play. TBR levels are set, EMA stack is mixed on the 5m. Bias is neutral-to-short on opens into the 24,200–24,240 zone. Stay patient, let the open settle before committing.

APRIL 1, 2025 - RECAP

ONE TRADE. ONE SETUP. DONE.

Waited on the 10:30 tendency, got a clean rejection off the top of the morning range. One entry, one exit. Didn't overstay. Called it after the setup resolved.

QUARTER-END FLOWS & WHAT THEY MEAN

Q1 end brought institutional rebalancing noise. Price moved away from value and snapped back. These aren't setups — they're liquidity grabs. Rule: don't fight quarter-end flow, wait for it to resolve.
